Put Your Community Garden on the Map

Healthy Soils, Healthy Communities

Please **"download"**, **"open"** or **"save"**, this form to fill in the fields below. Save the file to your computer and e-mail it to has34@cornell.edu by clicking "submit form" to add your community garden (or make corrections to an existing garden) to the map. You can find the latitude and longitude of your garden by clicking on this link. Enter the address of the garden in the box provided - you can drag the marker over the satellite image to make sure that the address takes you to the right place on the map before copying the coordinates. Please provide the **decimal version** of the coordinates rather than degrees. Please put "add community garden" or "correction to community garden" in the subject line of your e-mail. Once your form is received, your garden will be added to the map and you will be notified by e-mail. Thank you for participating in this project.

Garden Name

Organization

Street address   *Neighborhood (if in NYC)*

City   *State*   *Zip code*

Website

Email address

Telephone Number   *Size (in acres, if known)*   *Status (active or inactive)*

Latitude   *Longitude*
